

THE EARTHRISE PROJECT

THE EARTHRISE PROJECT

[urth-rahyz]

The rising of the earth above the horizon of the moon or other celestial body, viewed from that body's surface or from a spacecraft orbiting it.

EARTHRISE: First picture ever of the earthe from NASA APOLLO 8 Mission.

THE EARTHRISE PROJECT

1/ INTRO

THE EARTHRISE PROJECT is a moon discovery cruise intended for a civilian audience. Like explorers of a new world, participants will be immersed in a unique experience through a trip to the lunar surface aboard a vehicle specially designed to offer them the comfort, safety, and environment necessary for their well-being.

Space and the Moon are hostile environments due to their topology, but also because human beings must face the need to adapt to an atmosphere totally different from that of the earth, which can affect their physical , mental, and societal abilities.

THE EARTHRISE PROJECT will take all these factors into account in order to become a support tool for these space adventurers.

CONCEPT

MODULOR:

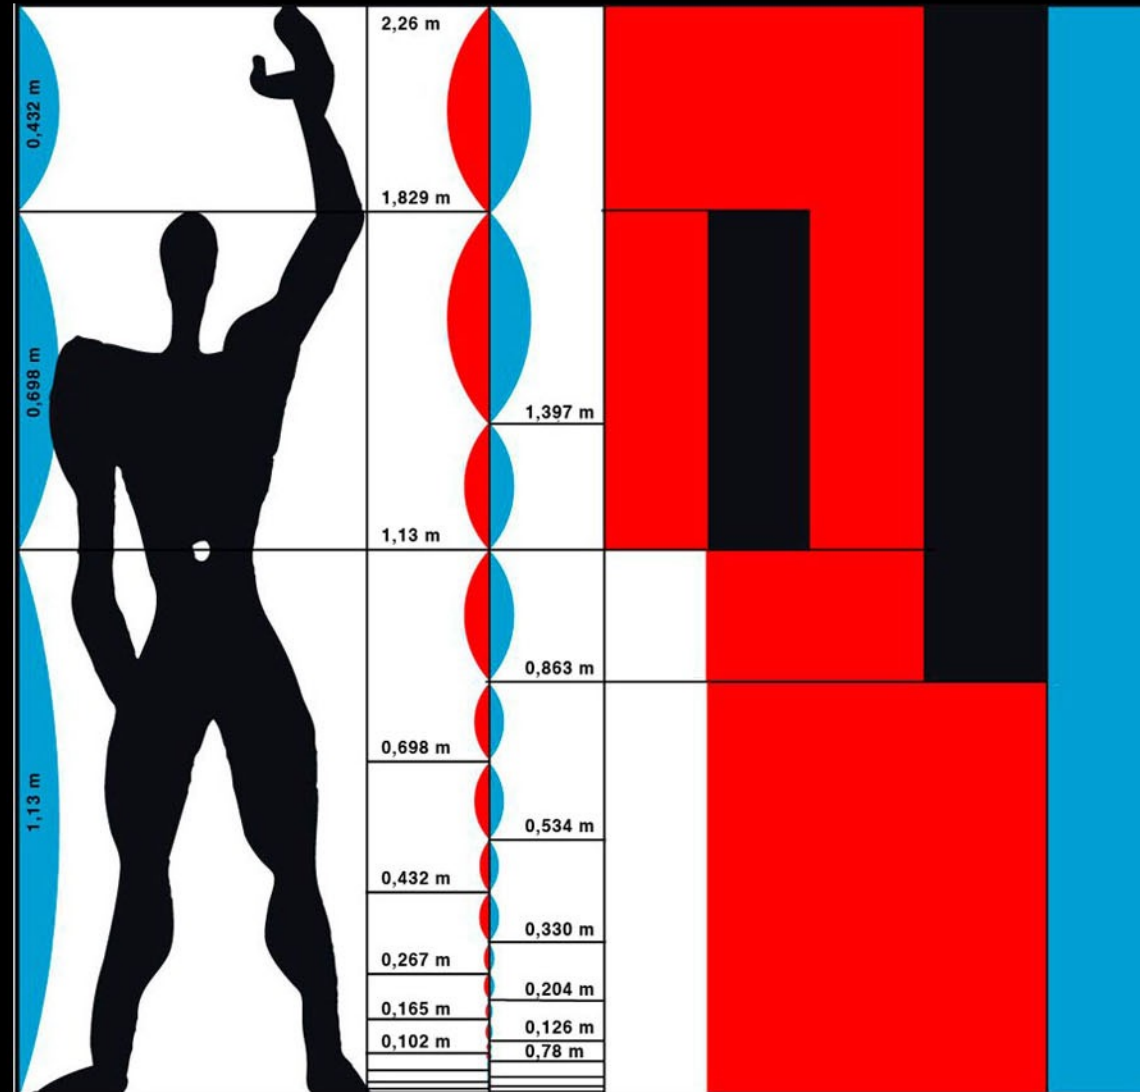

A living space calculated on the "golden number"

Shared space / Private space:

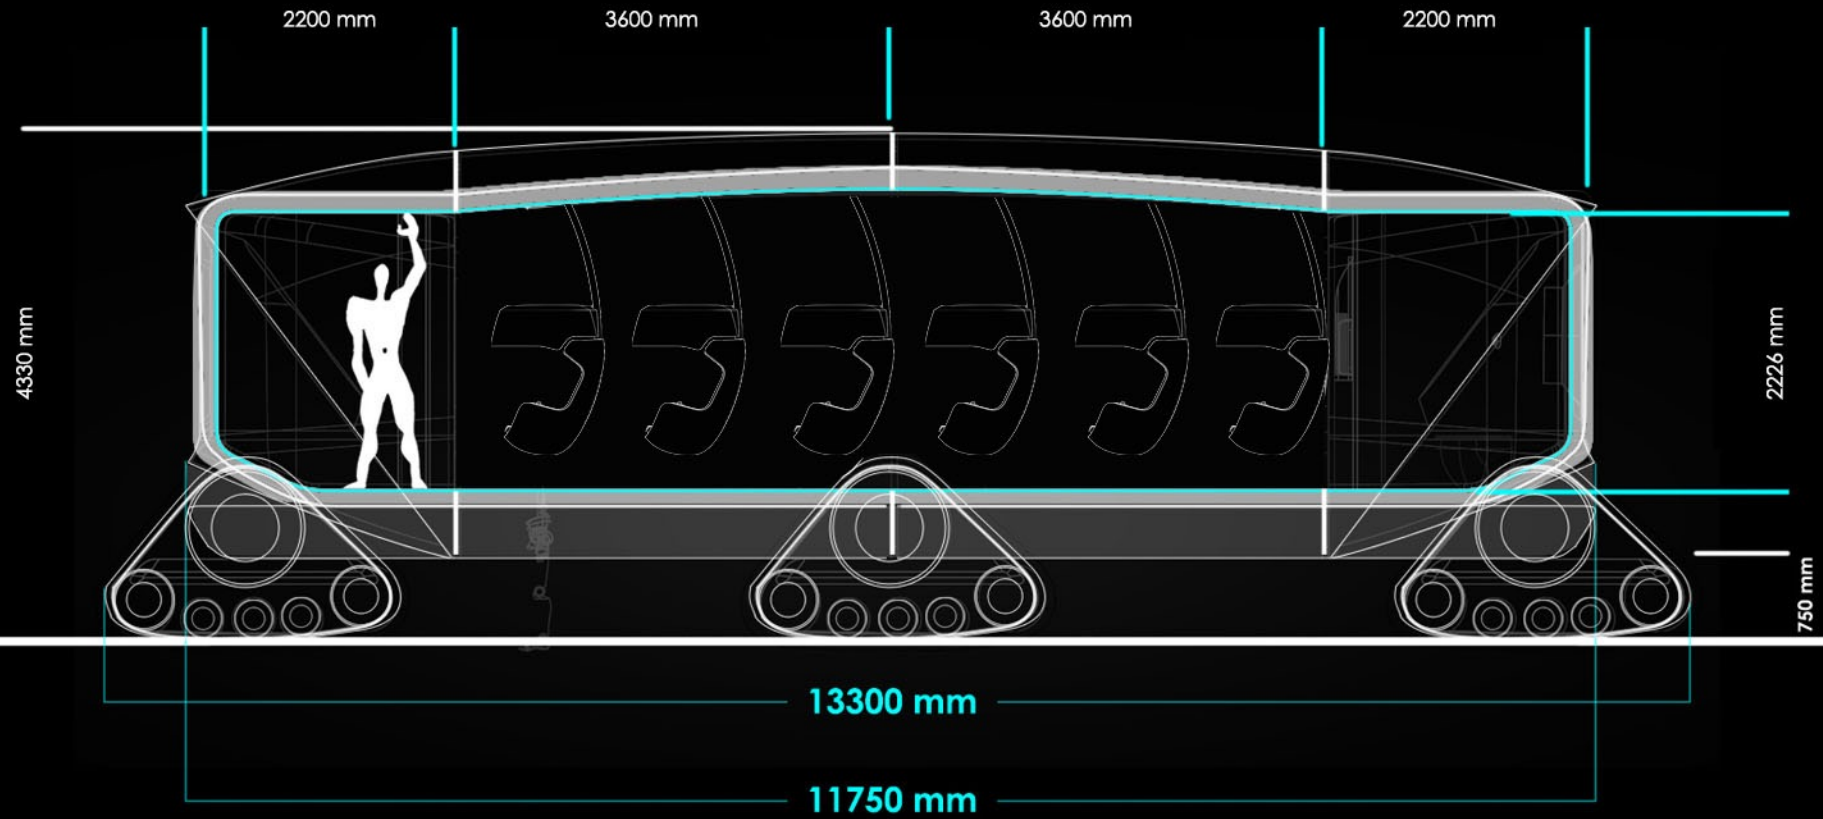

The reactions of humans in space studied by scientists show that promiscuity can create conflict situations.

A private space is therefore necessary in order to delay interactions between crew members.

However, it is necessary to create dynamics of exchange and that the participants in these explorations have a mission and objectives to fulfill in order to create group cohesion.

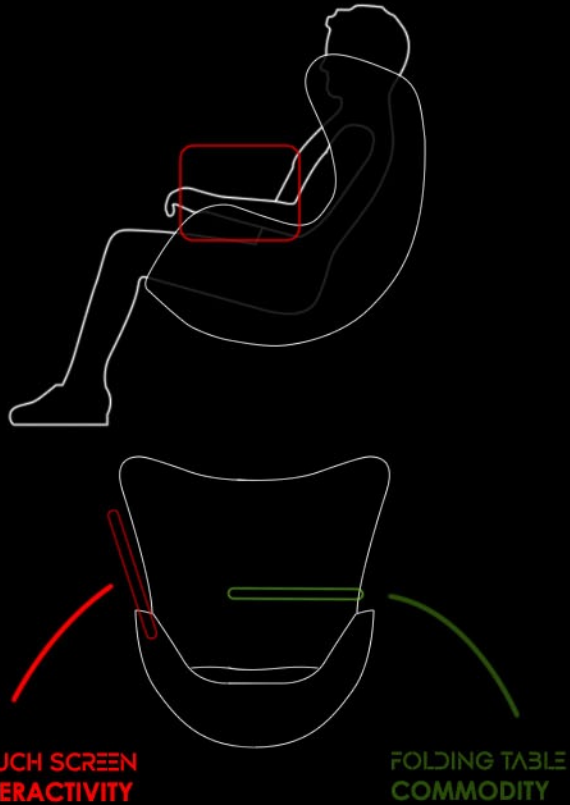

ARCHITECTURE

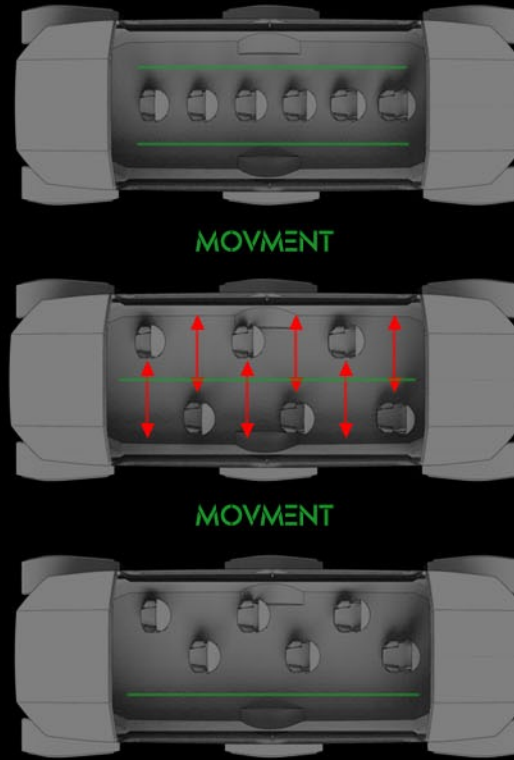

SOLUTION _ HUMAN

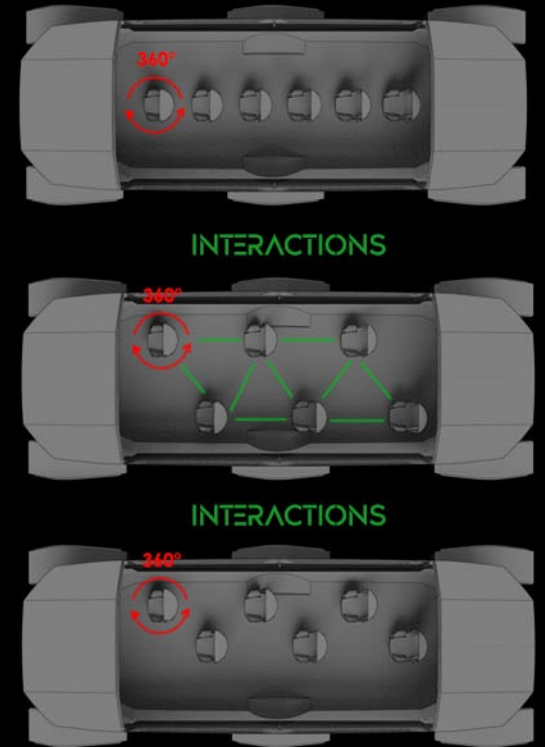

CONFORT ZONE / PERSONAL SPACE

FREE LATERAL MOVEMENT

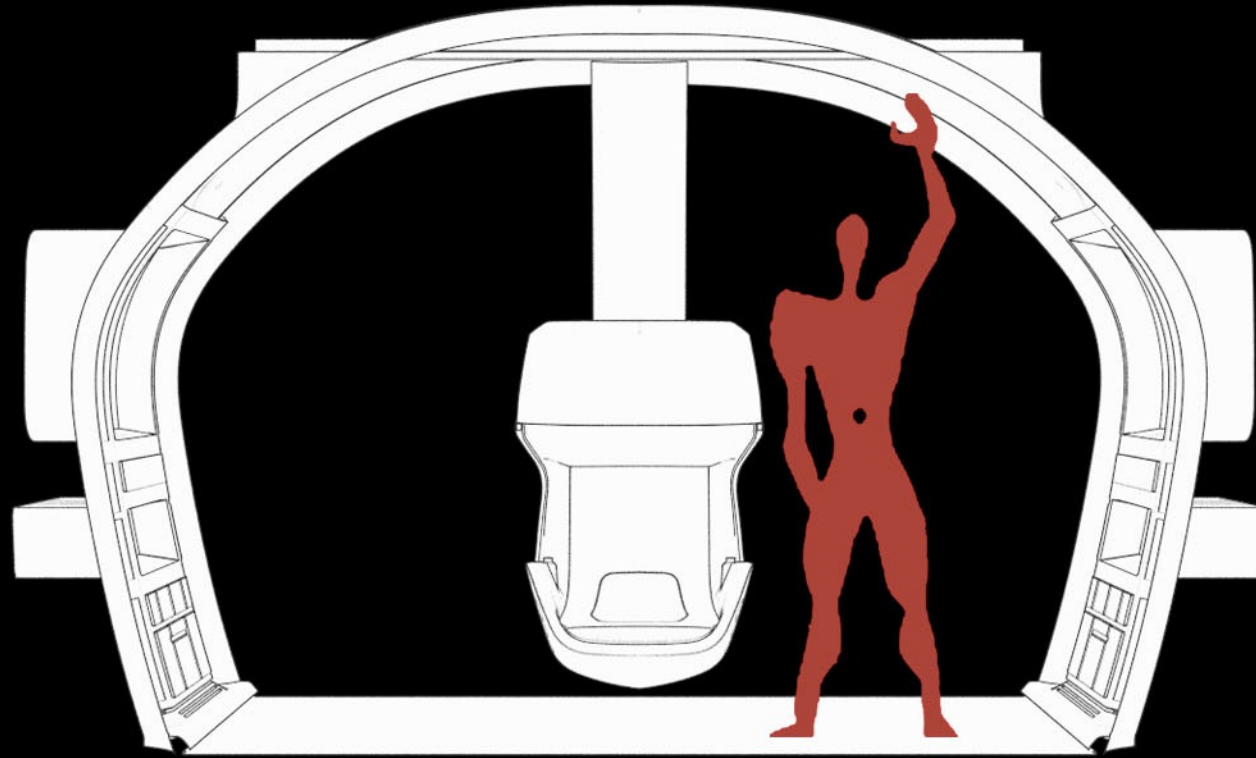

REAL INTERACTIVITY WITH PASSENGERS

CONCEPT

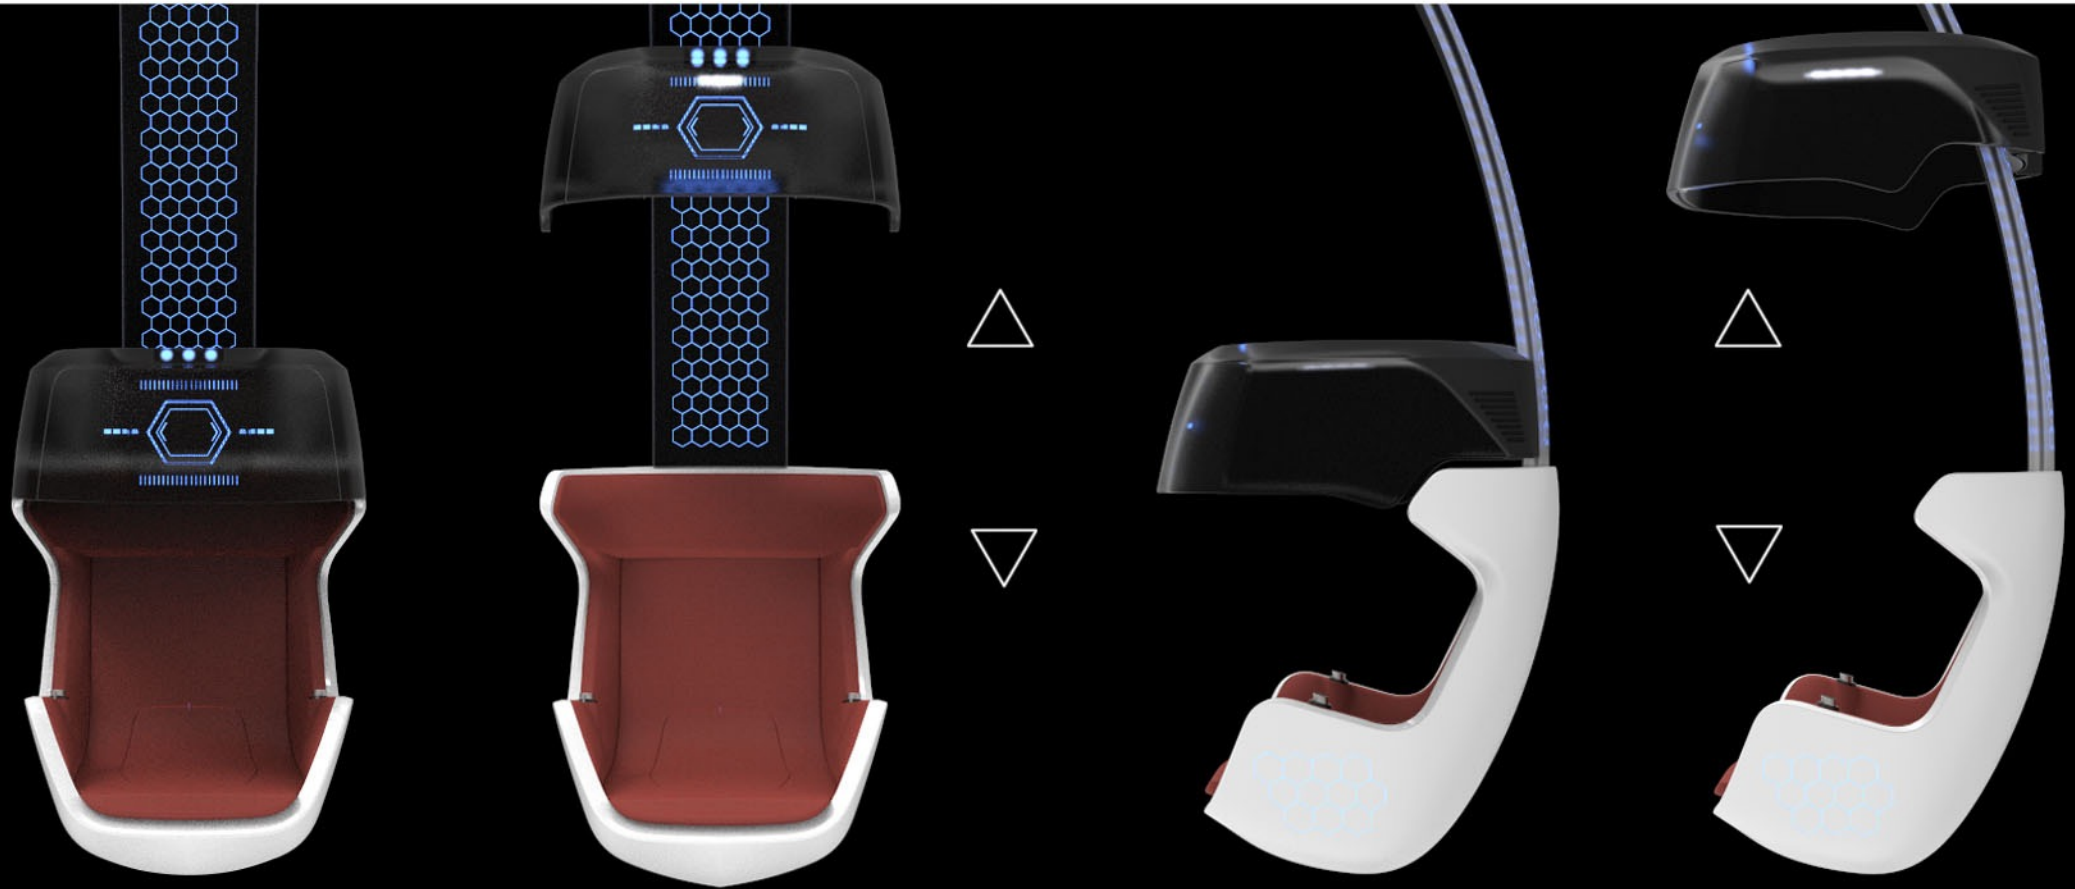

CONCEPT

SEAT MODULARITY

easy access / interactivity / intimacy

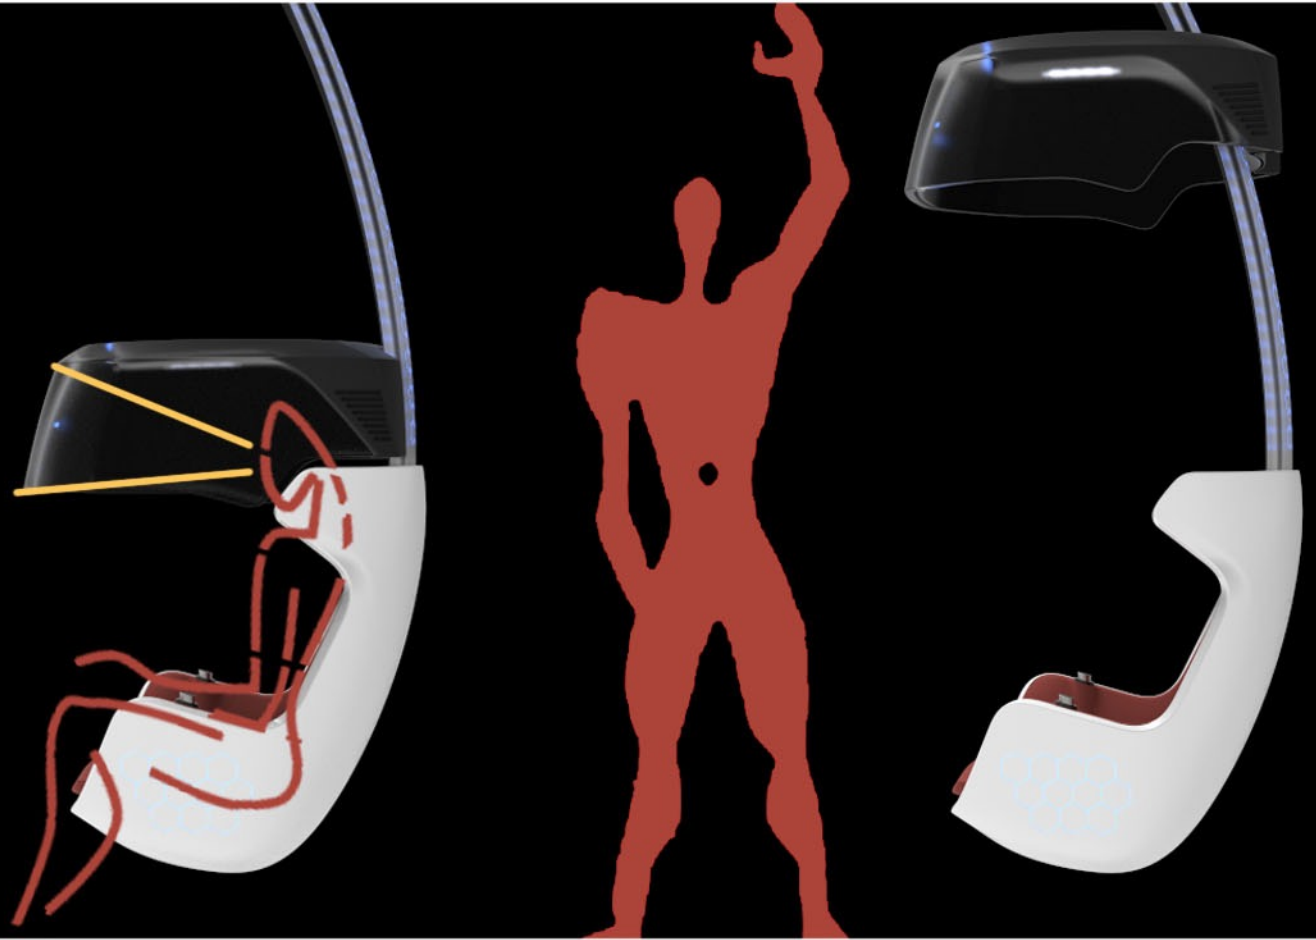

SEAT MODULARITY

easy access / interactivity / intimacy

HOLOGRAM SCREEN

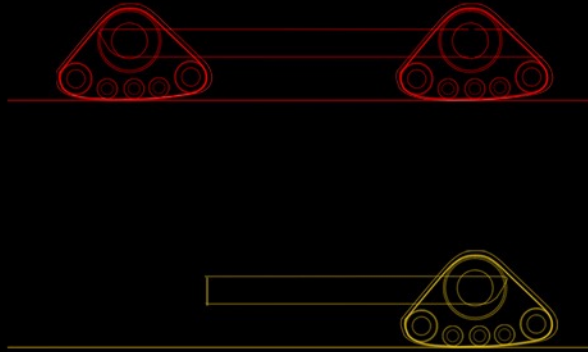

NAVIGATOR PADS

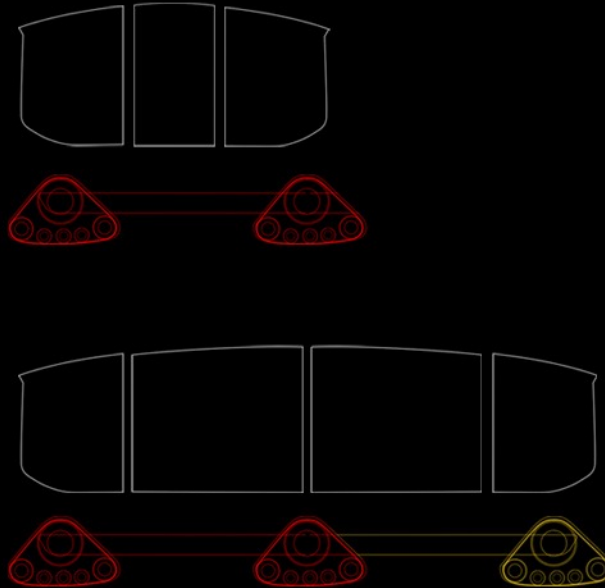

SOLUTION / MODULAR STRUCTURE

TECHNICAL STRUCTURE: 6m X 430 mm

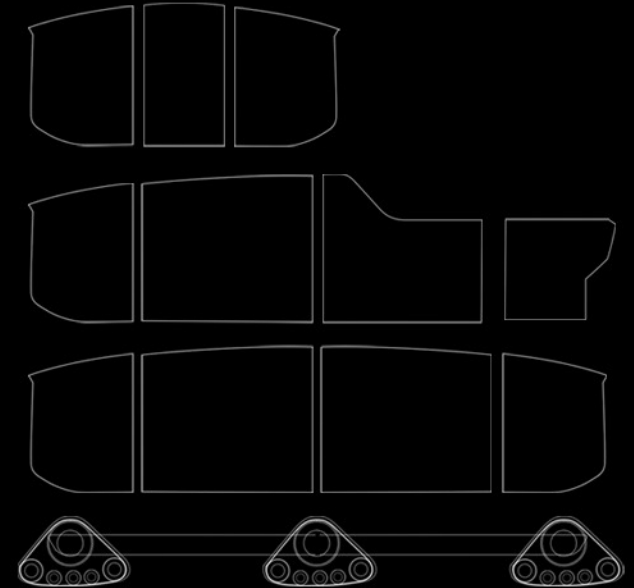

+ TRAILER: 6m X 430 mm

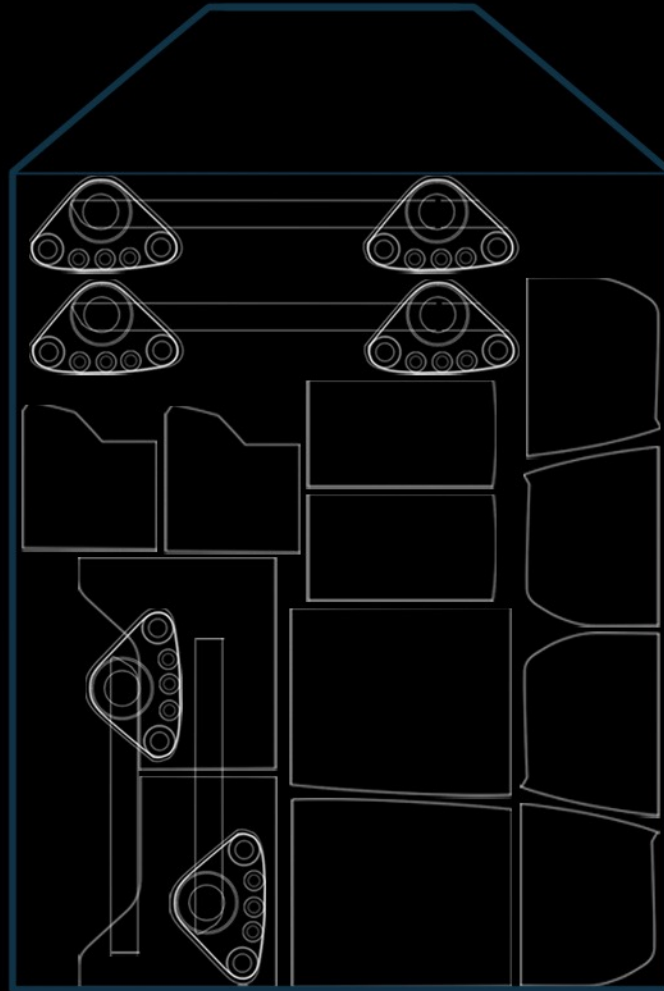

MODULAR SHAPE: Modules Plug-in

USE : Same technical structure / Various Modular Shapes

SOLUTION

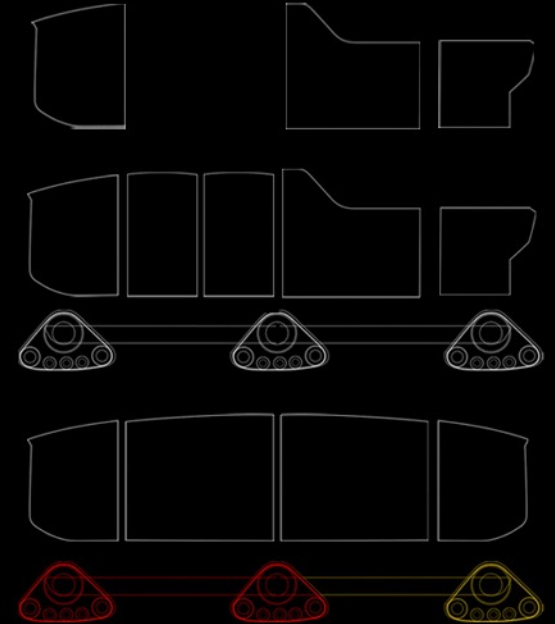

2 COMPLETE VEHICLES

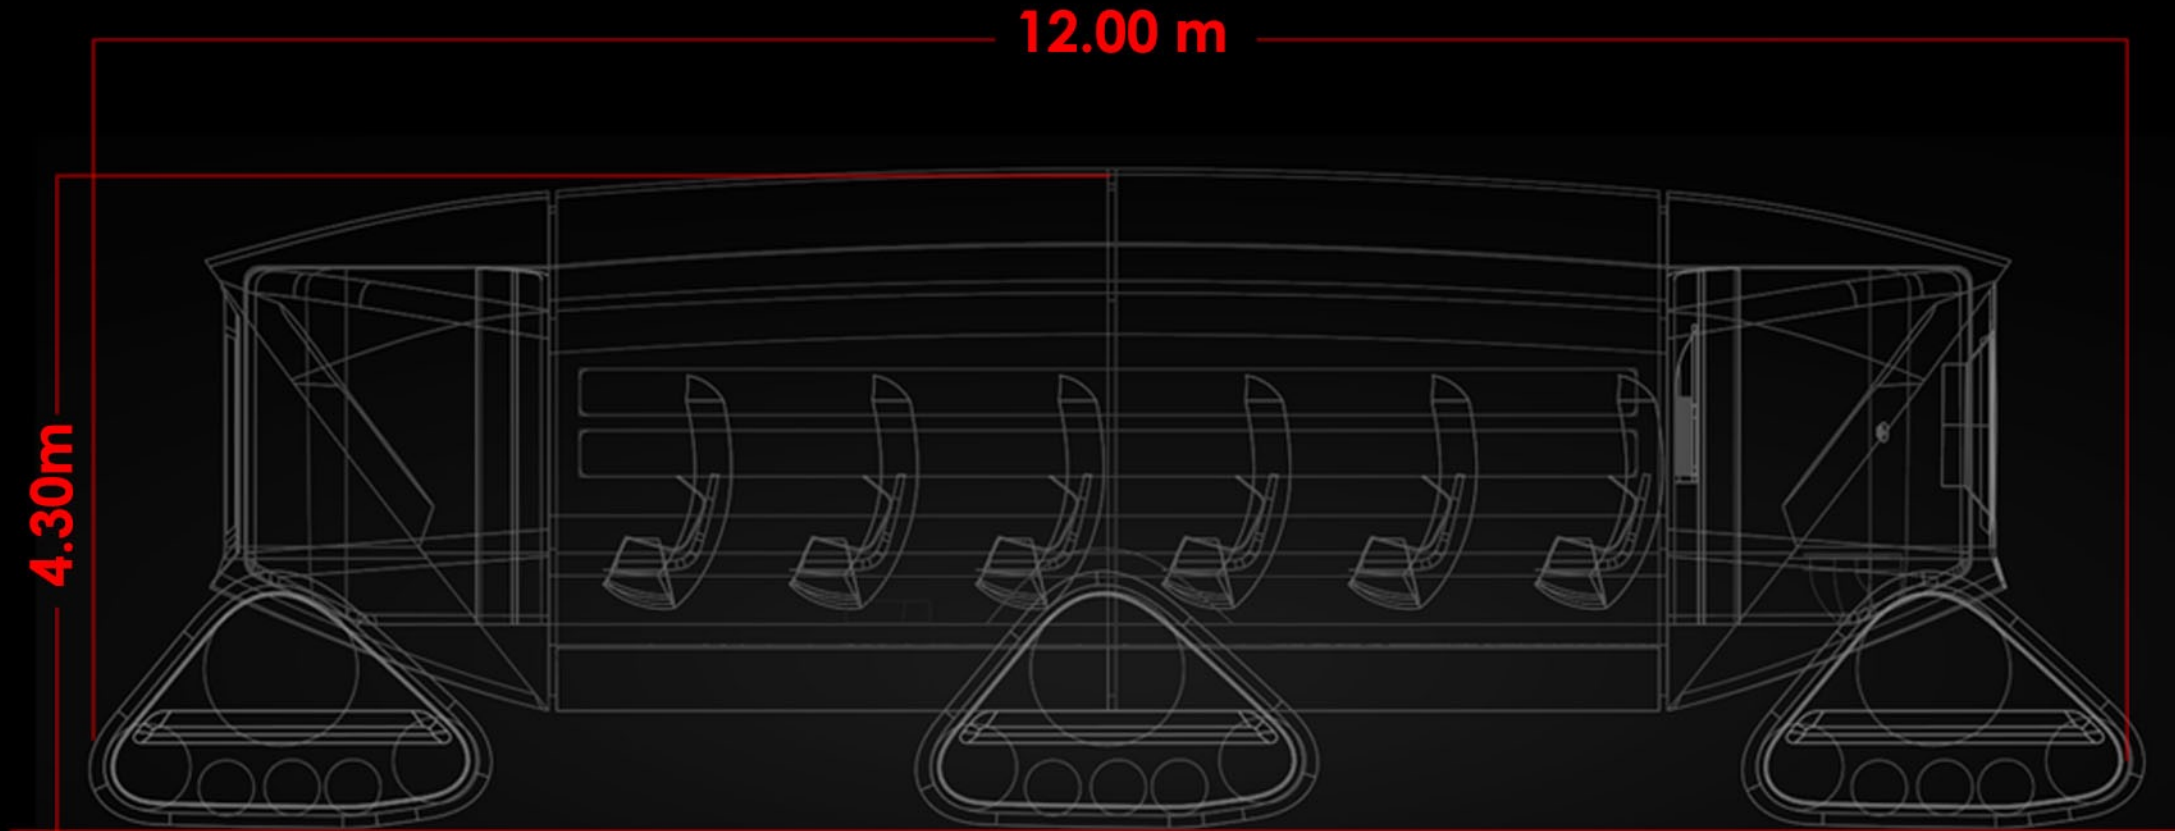

3 FULL BODIES

2 COMPLETE TECHNICAL STRUCTURES

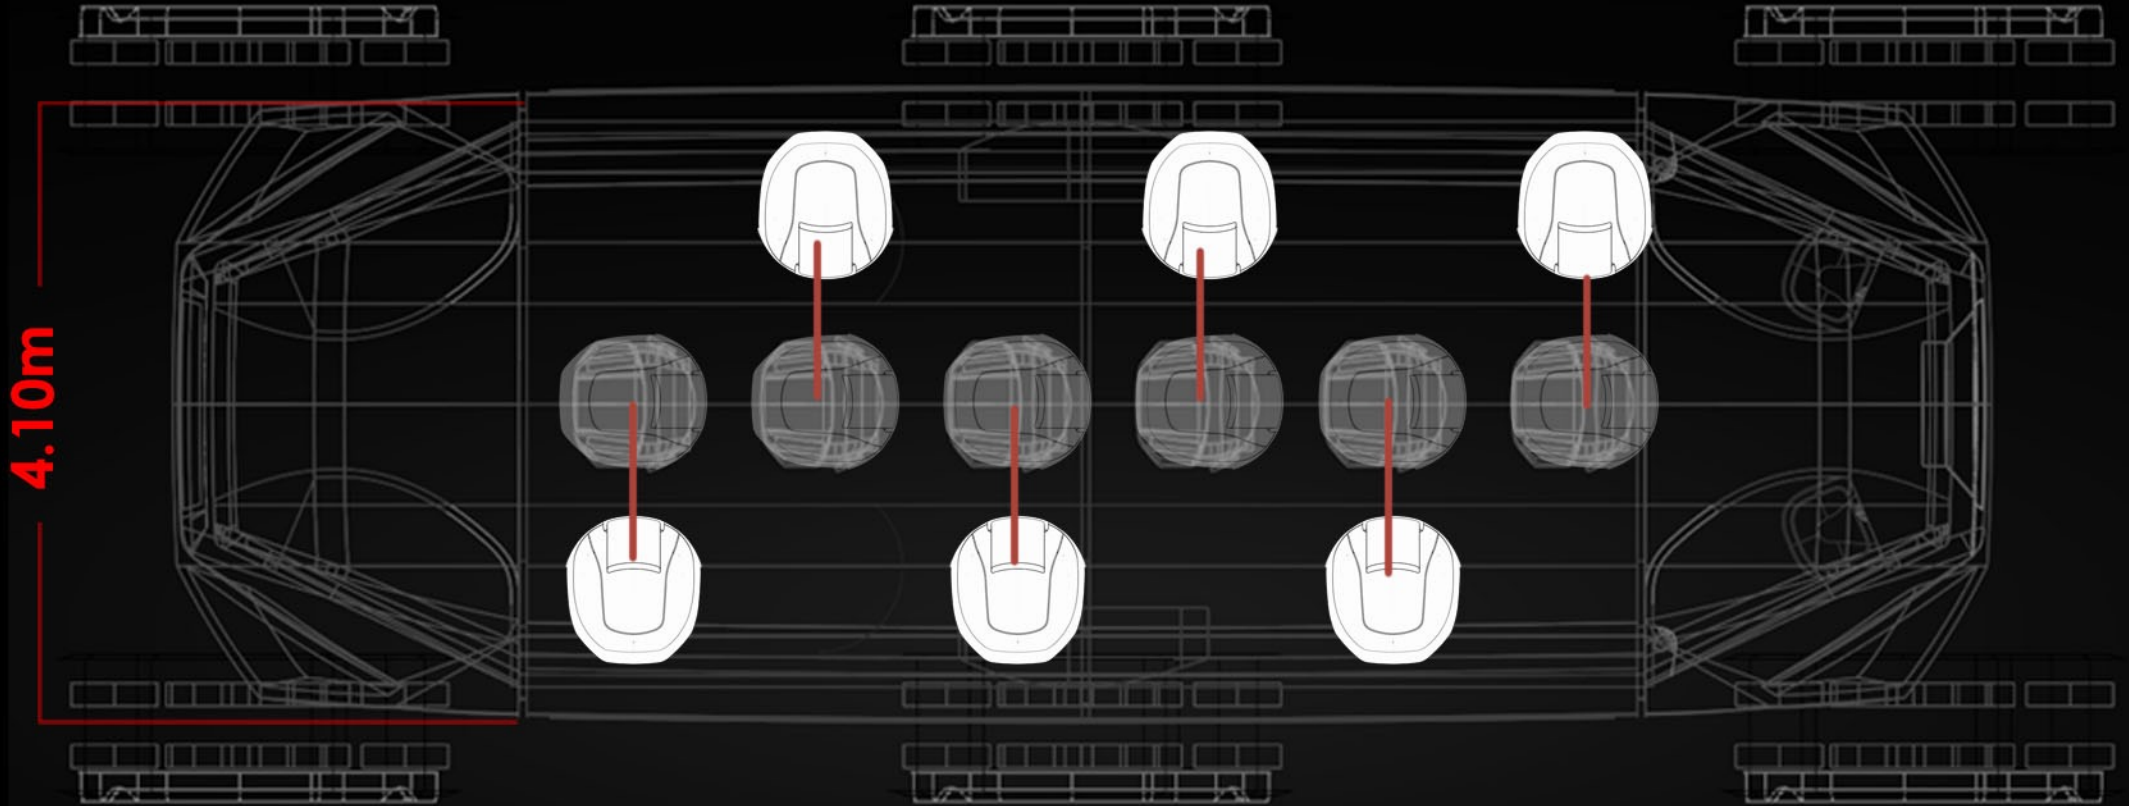

BODY SPARE PARTS
